How Knot to Lose that Fish! - The Trilene® Knot

The Trilene® Knot is a strong, reliable connection that resists slippage and premature failures. This knot can be used in joining line to swivels, snaps, hooks and artificial lures. The knot's unique double wrap design and ease of tying consistently yields a strong, dependable connection.

1. Run end of line through eye of hook or lure and double back through the eye a second time.

2. Loop around standing part of line 5 or 6 times. Thread tag end back between the eye and the coils as shown.

3. Wet line and tighten knot with a steady, even motion without hesitation. Trim tag end leaving about 1/4".
